Bonsai2X

Next Generation Drought Tolerant Tall Fescue

Bonsai 2X is an improved turf-type tall fescue that builds on the high quality and disease resistance of the original Bonsai. This new variety was specifically bred for enhanced drought tolerance, making it an excellent choice for areas with watering restrictions.

Key benefits of Bonsai 2X for commercial and residential landscaping include:

- **Exceptional Drought Tolerance:** This turfgrass only needs to be watered twice a week, making it ideal for regions facing water restrictions.
- **Compact Growth Habit:** Its dense, aggressive tillering and high shoot density create a thick, durable lawn.
- **Superior Disease Resistance:** Bonsai 2X is resistant to common diseases like stem rust and leaf spot.
- **Rapid Establishment:** This variety has an improved establishment rate, so you can enjoy a lush lawn sooner.

Bonsai 2X is a high-value turfgrass that provides a beautiful, low-maintenance lawn even in challenging conditions.
